

Sixth Avenue Station

Date : 23/04/2015

Sixth Avenue is an underground Mass Rapid Transit station on the Downtown Line Stage 2 in Singapore, formerly known as the Bukit Timah Line. The color motif is designed to portray water flowing from the North of the island of Singapore to the south at Marina Bay. Inspired by the element of water, ranges of blue and white panels were produced with [custom enamel colors](#) for this project, portraying the transition and fade effect of waves. This theme using natural elements can also be found in the connecting stations of [Tan Kah Kee](#) and [King Albert](#).

Partner: [CeramicSteel Alliance](#)

Artist: NIL

Colors: 1013, 5008, 5026, 5019 RAL
