

# Surface Care for Markerboard Applications

Polyvision e<sup>3</sup> CeramicSteel

---

# Cleaning + Care | Markerboards

## Cleaning Before First Use

1. If present, remove the protective film.
2. CLEAN: Wipe board with a clean cloth (\*) moistened with a mix of isopropyl alcohol and water (30/70) — the most effective whiteboard cleaner (\*\*).
3. RINSE: Rinse the surface with water and a clean cloth.
4. DRY: Wipe surface dry with a clean cloth.

## General Cleaning & Maintenance

1. CLEAN: Wipe board with a clean cloth (\*) moistened with:
  - a. Water: in most cases this will clean the surface just fine.
  - b. Or a mix of isopropyl alcohol and water (30/70%v/v) — the most effective whiteboard cleaner (\*\*).
2. RINSE: Rinse the surface with water and a clean cloth.
3. DRY: Wipe surface dry with a clean cloth.

Cleaning frequency depends on the intensity with which the writing surface is being used. Daily or at the very least weekly cleaning is recommended.

## Removing Markings & Residue

1. CLEAN: Moisten a clean, dry cloth with water.
  - a. Apply a small amount of an abrasive cleanser to the cloth.
  - b. Working in small sections, clean the area using a back-and-forth motion with gentle pressure.

Note: For best results, follow the manufacturer's instructions on the label.
2. RINSE: Rinse well with clean water as soap residues on the surface will result in decreased dry erase-ability.
3. DRY: wipe dry with a clean cloth.
4. To quickly and easily remove permanent marker, write over the top of the writing with a dry-erase marker. Then, simply erase. In most cases, this will remove the marker.

\* For best results use microfiber cloth

\*\*Using a non-appropriate cleaner may result in poor dry erase-ability due to the build-up of residues from the cleaner on the surface.
